Test Data changed to: *username: shoppervalid1, password 123456.*

3. **Scenario:**
   Users should see a list with related results in the Search menu.

ID #TC-POS4
Module: Search
Submodule: Search dropdown list
Environment: Desktop, Chrome browser (Version 114.0)
Description: Search should open a dropdown list, with dynamically changing results, from the input text as it's being written.
Test Data: "g" "r"
Preconditions:
Search field has no text input

Steps:
1. Navigate to the website - Search menu - Search pop-up.
2. Type in the search field the Test Data "g".
3. Check if the search results list show for "g".
4. Type in the search field the Test Data "r".
4. Check if the search results list change for "gr".

Expected result:
Dropdown list results change dynamically for each input data.

Actual result:
As expected, the results change as the test data is being typed.

4. **Scenario:**
    Logged out users cannot add products to their Favorites list, a message alerts them to Sign in to their account.

ID #TC-NEG1
Module: Add to Favorites
Submodule: Sign in Alert
Environment: Desktop, Chrome browser (Version 114.0)
Description: A user, that is not logged into their account, will be alerted to Sign in, when clicking the Add to Favorites button on a product..
Test Data: "boots"
Preconditions:
User is not logged in with an account.

Steps:
1. Navigate to the website - Search menu - Search pop-up.
2. Type in the search field the Test Data.
3. Click on the first search result from the list.
4. Scroll down to products.
5. Hover on any product's Favorites icon.
6. Click to add product to Favorites list.
7. Check if the alert banner pops up on top of the page.
8. Check if the alert has the message "Sign in to add items to favorites".

Expected result:
Product is not added to Favorites List, user receives a message alert to sign in.

Actual result:
As expected, the product was not marked as Favorite, a message alert appears with the Sign in option.
